

veterinary Portfolio Analysis Tool (vPAT-Online)

Vetnosis has introduced the veterinary Portfolio Analysis Tool (vPAT-Online), a proprietary online database containing the latest 'techno-commercial' information on licensed veterinary medicines and animal health products.

vPAT-Online is a 'must-have' online database that now makes it possible to rapidly search and analyse 'techno-commercial' information on more than 37,000 products marketed by more than 700 companies in 11 key country markets. All product information has been translated into English and standardized and is maintained by a team of Analysts.

Content can also be searched by date, making this a dynamic database that tracks products through their life-cycles.

vPAT-Online Coverage:

Business-critical 'techno-commercial' information on licensed veterinary medicines and animal health products marketed in 11 key country markets. Our Analysts gather and analyse information from companies, regulatory authorities and media.

	Licensed Veterinary Medicines	Other Animal Health Products	Non-Medicinal products
Leading Animal Health Companies	✓	✓	✓
Other Animal Health Companies	✓	✓ /x	✓ /x
